Professional Summary

Economics and Development Studies graduate with practical experience in frontend and backend web development, IT systems administration, and educational support roles. Demonstrates strong analytical thinking, problem-solving ability, and adaptability in both technical and administrative environments. Experienced in building responsive web interfaces and supporting institutional digital systems. Seeking a Master's program to further develop expertise in technology-driven business and data-oriented fields.

Core Competencies

- Frontend Development: HTML5, CSS3, JavaScript, React
- Backend Development: Node.js, Express.js, REST APIs, Authentication Systems
- Database & Data Management: MongoDB, Data Handling, School Portal Administration
- Software Engineering: Debugging, Performance Optimization, API Integration
- Digital Systems Operations: Examination Registration, Technical Setup & Invigilation
- Tools & Collaboration: Git/GitHub, Virtual Assistance, Technical Support

Professional Experience

National Youth Service Corps (NYSC) – Graduate Intern | 2024

- Completed mandatory national service with practical institutional placement.
- Supported administrative operations and digital record management.
- Assisted in examination coordination and technical setup (JAMB, WAEC).
- Provided IT support and ensured smooth digital systems operation.

Healthcare Web Development – Frontend Developer | 2025

- Developed responsive healthcare web interfaces and improved usability.
- Implemented interactive frontend features and optimized user experience.

High Bravado School, Ogun State – Teacher & IT Staff | 2024

- Delivered classroom instruction while supporting curriculum development and student engagement.
- Served as School Portal Administrator responsible for managing institutional records and digital data systems.
- Coordinated registration, technical setup, and invigilation support for JAMB, WAEC, and other external examination bodies.
- Provided technical troubleshooting and operational support for school-based digital infrastructure.

Online Administrator (Upwork) – Virtual Assistant | 2023

- Managed schedules, online correspondence, and digital organization.

Nestling Private School – Teacher | 2015–2017

- Taught primary school students and managed classroom activities.

Education

- B.Sc. Economics & Developmental Studies – Federal University Dutsin-Ma | 2019–2023 | GPA: 3.39/5.0
- NYSC Certificate of National Service | 2024
- WAEC Certificate | 2015
- High School Diploma – Higher Ground College | 2008 - 2014

Projects & Technical Experience

- Developed and maintained African Recipes, a culturally focused recipe platform featuring user authentication, recipe management, interactive engagement features, and responsive user interfaces. (www.afrirecipes.com)
- Implemented backend functionalities including API development, authentication handling, database integration, and content management workflows.
- Built interactive full-stack web applications using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.
- Designed dynamic frontend experiences with responsive layouts, browser storage functionality, and real-time interface updates.
- Applied debugging, optimization, and software maintenance practices to improve usability, scalability, and application performance.
- GitHub Portfolio: github.com/BilliOnz0
